

Monitoring and Evaluation approach for the regenerative projects

Presented by

Paulinho Muzaliwa,

Founder of UNIDOS Social Innovation Center

A recipient of the Gene Dewey Refugee Award

organized by USA for UNHCR 2024

Introduction

we're exploring key concepts in Monitoring and Evaluation: **outputs, outcomes, and impacts**. These terms form a results chain that helps us understand and measure the progression of change we aim to create through our projects.

Output Level

Your project's immediate results

Outcome Level Result

Your Big change, how your project impacted people's behavior change, what success looks

Impact Level Result

How does the project contribute to the overall country indicator, refers to the long-term, broader changes that the project ultimately aims to achieve

Thank you
